CANADIAN PUBLIC OPINION RESEARCH

MOST CANADIANS WANT TO SEE BOLD NEW IDEAS IN POST-COVID RECOVERY AGENDA

CONDUCTED FOR THE BROADBENT INSTITUTE

RESEARCH AND ANALYSIS FROM CANADA'S LEADING PUBLIC
AFFAIRS AND MARKET RESEARCH EXPERTS

METHODOLOGY

The survey was completed online with 2,000 Canadian adults from September 4th to 9th, 2020. A random sample of panelists were invited to complete the survey from a set of partner panels based on the Lucid exchange platform. These partners are typically double opt-in survey panels, blended to manage out potential skews in the data from a single source.

The margin of error for a comparable probability-based random sample of the same size is +/- 2.27%, 19 times out of 20.

The data were weighted according to census data to ensure that the sample matched Canada's population according to age, gender, educational attainment, and region. Totals may not add up to 100 due to rounding.
